

2021 EXHAUST BULLETIN (3/17/21)

Please note that we have reverted back to the 2020 Exhaust Rule. The following rule #3 verbiage under **EXHAUST** has been removed:

~~3. The exhaust flow must be parallel to the ground. Exhaust systems that direct the flow to the ground will not be permitted.~~

The entire **EXHAUST** section now reads as follows:

EXHAUST:

1. Collector-type headers required. Must have four (4) tubes into one (1) collector of a consistent diameter.
2. NO tri-y headers, merged headers, or square-tube headers allowed.
3. Mufflers not required unless track mandates. *When mandated, mufflers must have some type of internal noise dampening characteristics, baffles, extruded holes, screen, chambered, etc. Mufflers must meet local speedway's noise decibel requirements. External mufflers only.*
